SETUP

1. Install dependencies in requirements.txt

2. Run `python dashboard.py` and you will be provided a url link like this. By the way, I'm using python==3.6.9.

3. Open the url in a browser and you'll be welcomed to the dashboard below.

Ignore the error message and select
* Violence against women Percentage for Target Indicator
* Gender equality for Input File
* Women who believe a husband is justified in beating his wife (any of five reasons) (%) for Input Indicator

Then explore as you like.
